

# Dental Treatment Guarantee

At Gerber Dental Group, we believe that the quality of the dental treatment we provide is of the highest standard. We are pleased to support this belief with a limited warranty that will cover your treatment for a period of three (3) years.

Regular maintenance of your teeth and gums is vital to ensure the success of your new restoration, so we encourage you to attend your 6 monthly preventive care appointments. Regular maintenance includes a routine restorative and periodontal exam every six months, a clean and polish every six months, and routine radiographs every twelve months.

If your new crown, bridge, ceramic restoration or veneer cracks, chips or breaks during the next three years, we will replace it free of charge, providing you have attended your regular 6 monthly preventive care appointments since the completion of your treatment.

This limited warranty applies to normal wear and tear only and will not apply if your teeth are damaged through any type of accident or injury. Failure to maintain your dental treatment by not attending six monthly preventive care appointments will also void this warranty.
